INITIAL BUILD NOTES

- Love that the albums spin like records when hovering. Wasn't super clear though that they're interactive so I didn't initially think to hover over them. Maybe place them more toward the center so it happens more likely early on in the user experience and attains more focus.

- The negative space in left part of screen isn't working super well.

- Maybe separate out "frank" and "ocean"

- On full screen, the records completely cover frank's face

- I like the boom pow-esque shapes! Esp in pink

- Pale green hover color of frank ocean isn't matching bright color scheme vibe.

- I'd change font of frank ocean description on front page to a more sleek/modern san serif to contrast the title
